

GROEN

ENVIRONMENTAL SYSTEMS INC

DESIGN BUILD MECHANICAL CONTRACTORS

With over 15 years experience, Groen Environmental Systems Inc. has provided its clients with **quality service**, **design** and **installation** of customized **mechanical** and **construction** projects. Our professional staff excel in **design-build** projects, combining engineering, procurement, project management and commissioning. More recently Groen has assisted clients in designing and constructing **commercial greenhouses** and **vertical farms** while developing eco-friendly designs utilizing energy efficient products. Groen has completed several large scale projects on the West-Coast and assisted in design across North America.

OUR VISION

Groen's commitment to designing sustainable systems, quality installations and customer interaction has helped us build our reputation over the last 15 years. We provide mechanical engineering services and consultation to our clients during the course of our projects ensuring that we hand our clients a system that meets their short and long term requirements.

"We are experienced professionals who complete quality projects. We guarantee that we'll find an efficient solution to your needs"

DESIGN BUILD SERVICES

Groen focuses on the needs of our clients, and on assisting them in reaching their project goals. We consider traditional and cutting edge mechanical designs to determine the most effective solution to your needs. Our team consists of Professional Engineers and LEED accredited professionals.

HVAC

Excellence in design, service and installation, quality products and highly trained technicians have made our company a leader among Air Conditioning & Heating Professionals. Our foundation is built on field experience and technical depth. Our HVAC Services include rooftop units, make-up air, boilers, water heaters, infrared, chillers and more, simply tell us your requirements.

BUILDING AUTOMATION SERVICES

Groen will help you select the system that best meets your needs. We deal with certified controls specialists well versed in LonWorks, Honeywell and Siemens platforms. Groen often employs the latest wireless technologies from Honeywell Automation Systems to reduce the needs for wire runs. We also offer services to upgrade your older legacy systems in existing buildings.
